

## Academic Center of Excellence (ACE) Program in Detail

### Benefits of being a Definiens Academic Center of Excellence

Access to a number of days dedicated advanced consulting and technical support including project deliverable planning.

An additional discount of 25% from the current academic list price to any additional Definiens software product.

A free upgrade and support service for all Definiens software licenses of the Center of Excellence which includes all academic education licenses; upgrade service always guarantees the most up to date Definiens software license.

Participation in Definiens certain pre-release and beta-test programs.

Free participation for two participants in "Definiens User Meetings". Free participation does not cover participant's travel and accommodation costs.

When unpaid places are available, free participation in the Definiens Academy training, Definiens internal education program, or other Definiens training courses may be made available. (Free participation does not cover participant's travel and accommodation costs.)

Occasional internships for students from the Center of Excellence at Definiens' headquarters in Munich, Germany.

### Duties of being a Definiens Academic Center of Excellence

A Definiens Academic Center of Excellence shall license a minimum of 5 Definiens Developers, 5 Definiens Architects, and 6 Definiens servers which will be available to students and researchers.

Offer higher education and training in Definiens products for its students on a regular basis, e.g. seminars and courses.

Perform and publish image intelligence research and applications, specifically using Definiens products.

Publish at least two peer-reviewed image intelligence papers. Copies should be provided to Definiens in digital format.

Present at least one Definiens product related paper given at an internationally recognized conference. Copies should be provided to Definiens in digital format.

At least one degree (diploma, master, doctoral) hosted by the Center of Excellence should have been performed or should be in progress.

Display the status as Definiens Center of Excellence and the current use of Definiens products on its relevant web site. Maintain a webpage for all research projects where Definiens products are used.
