

# Course Description

## Definiens Developer Basic Training II

Duration: 3 days

After completing the course, participants will be able to solve challenging image analysis tasks. Participants should have attended the Definiens Developer Basic Training I. The three-day Definiens Developer Basic Training II is given by an experienced Definiens instructor in English.

### Module 1: Segmentation Techniques

Discover the versatile segmentation and image object reshaping options provided by Developer

### Module 2: Classification Techniques

Expand your knowledge on threshold- and fuzzy classifications to describe your objects of interest

### Module 3: The Image Object Domain

Practice the various applications of the image object domain concept

### Module 4: Working with Parent Process Objects

Discover the possibilities of highly specific local and regional processing

### Module 5: Speed up your Rule Set Development

Learn useful strategies to efficiently develop advanced rule sets

### Module 6: Converting Developer Rule Sets into Architect Solutions

Create accessible rule sets that can be fine-tuned by other scientists
